My power just went back on this week!

statements from Puerto Ricans we met along the way, five months out

(Always with a smile: upbeat, people are totally willing, to share)

*my husband and I had no power where we were,
we had to go live with his parents, who have a generator
and we all were looking after his grandparents who lived
nearby there but they didn't have any power;
it was a bit cramped*

*plus the generators broke down; his father had to buy
three separate generators; they are rated for not more
than 21-day continuous use!*

*I expect the hurricanes to continue to get worse year after
year, but I love it here, and wouldn't want to leave*

– restaurant hostess

Puerto Rico still needs a lot,
as our speakers will agree,
and maybe you're able to help.

If you're a tourist: go visit, Puerto Rico is open.

It's a jewel, people are amazing, food is great.

The recovery to date is immense. And ongoing.

Most sites are up; the economy needs tourists.

Puerto Rico se levanta!
