BPI SESSIONS

The following sessions offer CEUs toward Building Performance Institute (BPI) certifications.

THURSDAY, MAY 6

Session 1: 8am-9am
- Achieving Performance Goals: Modular New vs. Retrofit Existing
- Comparing the Operating Performance of High Performing Public Buildings to their Design
- New Zero Single Family Remodel: Whys & Woes

Session 2: 9:30am-11am
- Public Health & the Built Environment: Putting Research into Action
- Understanding Boston’s Proposed Performance Standard

Session 3: 11:30am-12:30pm
- Why Go Deep? Retrofit Lessons from Low-Income Multifamily Projects
- Electrifying Hard-to-Heat Buildings

Session 4: 1:30pm-3pm
- The Next Frontier: Material Transparency Across Disciplines

Session 5: 3:30pm-4:30pm
- Multifamily Humidity Control Problems: Muggy Mayhem

FRIDAY, MAY 7

Session 6: 8am-9am
- HFC Refrigerants in Heat Pumps: Regulatory Update & Emissions Analysis

Session 7: 9:30am-11am
- Pilotinig, Scaling & Committing to Healthier Materials

Session 8: 11:30am-12:30pm
- Decarbonization of Domestic Water Heating in Multifamily Buildings
- Leaving the Mesozoic Behind: From Fossil Fuels to the Future via Carbon-Neutral Buildings
- Modular vs. Stick-built: A Side-by-Side Comparison with Habitat for Humanity
- Today’s Acceptable Ventilation is Unacceptable

Session 9: 1:30pm-3pm
- Historic Buildings & Climate Change Mitigation: Case Study of a Low-Carbon Renovation
- Leveraging Diversity to Meet the Climate Challenge
- Sheridan Small Homes: Affordable Passive Houses for In-Fill Development

Session 10: 3:30pm-4:30pm
- Single Family Retrofit to Passive House EnerPHit Standards
