Messages

NYSEG has reduced its electric transition charge effective November 1 through November 30, 2013. This reduction is the result of a financial settlement by power producer Constellation Energy Commodities Groups to resolve a dispute with the Federal Energy Regulatory Commission. Some electricity customers will see a separate Constellation refund credit, if any part of their electricity load is exempt from the Transition Charge. For more information, visit www.dps.ny.gov/. In the "Search" box enter case 13-E-0232.

Effective October 1, the Renewable Portfolio Standard (RPS) charge on electricity bills has changed. The RPS is a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission. It is combined with the System Benefits Charge and the Energy Efficiency Portfolio Standard charge and displayed as one line item on your bill.

For some customers, effective November 1, the revenue decoupling mechanism (RDM) adjustment has changed. This item, either a charge or credit, reflects the difference between forecast and actual delivery revenues by service classification. It is designed to encourage utilities to promote energy efficiency and renewable energy technologies.

Terms and Definitions

Delivery charge: what you pay NYSEG to transport energy to your home or business.

Supply charge: what you pay for the energy purchased for you by NYSEG or a supplier other than NYSEG.

Payment & billing services charge: the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than NYSEG will not be assessed this charge by NYSEG if their ESCO's supply charges appear on their NYSEG bill, however, their energy supplier may charge a similar fee.

Competitive meter charge, Competitive meter service charge, and Competitive meter data service: apply to customers billed under service classes 2, 3, and 7 whose metering services are provided by NYSEG. These meter services charges, previously included in the customer charge, are now broken out in the electricity section of the bill. Customers with a demand of 50 kilowatts or more for two consecutive months who use a meter service provider and a meter data service provider other than NYSEG are not assessed these charges.

Basic service charge: includes a portion of the cost of the meter, meter reading, billing and part of the cost for delivery service. Appears on your bill whether or not you use any electricity or natural gas during the billing period.

Kilowatt-hours (kwh): measure of electricity use.

Residential consumer discount: monthly payment received from the New York Power Authority (NYPA) to be used for the benefit of residential customers. It is included in the Transition Charge.

ccf (hundreds of cubic feet): measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

Merchant function charge: reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than NYSEG are not charged by NYSEG for this service.

New York State Assessment: As required by state law, effective July 1, 2009, utilities must collect a special state assessment from all customers for the state's general fund. Utilities are required to collect this assessment through March 2014.

Reliability support services (RSS) charge: the cost incurred by NYSEG for third-party services to ensure local electric reliability needs are met.

Renewable Portfolio Standard (RPS) charge: a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission.

System Benefits Charge (SBC): a state-mandated charge for all electricity and natural gas customers. The electricity SBC is used to fund energy efficiency programs to meet state energy use reduction targets, provide assistance for low-income customers and conduct energy research. The natural gas SBC is used to fund initiatives focused on reducing natural gas use in the state as part of the Energy Efficiency Portfolio Standard. These charges were required by the Public Service Commission.

Revenue Decoupling Mechanism: a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

Weather adjustment: moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

Meter Mult (Meter Multiplier): when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "NYSEG Detailed Account Activity" section of your bill.

Transition charge/surcharge: reflects the costs of making the electricity and/or natural gas industry more competitive; includes associated credits and/or charges.

Prorated bills: calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

Pay your bill by mail, at nyseg.com or at any of NYSEG's authorized pay agents. If you pay in person, please bring your entire bill.

Payment is due when you receive your bill. Your payment must be postmarked by the "Late Fee After" date shown on page 1. If paying in person, payment must be made by the "Late Fee After" date. Payments received after the "Late Fee After" date will be subject to a 1.5% late payment charge per month.

Effective January 1, the System Benefits Charge (SBC) and the Energy Efficiency Portfolio Standard (EEPS) charge on electricity bills has changed. SBC is a state-mandated charge used to fund energy-efficiency programs to meet state energy-use reduction targets. EEPS is a state-mandated charge used to fund rebates to encourage people to buy and install high-efficiency energy appliances. For details, visit nyseg.com. Click on "Your Account" and then on "Reading Your Bill."

Prevent deadly carbon monoxide (CO)! Have your heating system, chimney, flues and vents checked by a professional, and use a CO detector. If you need to report a suspected carbon monoxide problem, get up, get out and then call either 911 or us (1.800.572.1121).

Messages

The NYSEG price for providing electricity supply during this billing period was \$0.18788016/kwh which includes a Merchant Function Charge of \$0.0032/kwh. If you decide to shop for electricity supply, you can compare this information with prices offered by energy services companies (ESCOs). You could achieve some tax savings if you switch to an ESCO. Additionally, if the ESCO includes its charges on your NYSEG bill, you would not have to pay NYSEG's bill issuance charge. If you buy electricity from an ESCO, NYSEG will continue to deliver the electricity to you and you will continue to pay NYSEG for delivery, transition and basic service charges.

Included with this bill is our annual Rights and Responsibilities brochure that summarizes our service policies and your rights under Public Service Commission rules and state laws. It's also available at nyseg.com under "Your Business" in the "Energy Library."

Effective February 1, the reliability support services (RSS) charge on electricity bills has changed. This charge reflects the cost incurred by NYSEG for third-party services to ensure local electricity reliability needs are met. For details, visit nyseg.com, click on "Your Account" and then on "Reading Your Bill."

Call 811 before you dig. Whether you're a contractor or a homeowner, having underground utilities marked before any excavation work begins is essential to protecting yourself from injury and preventing damage to underground utilities. To have underground utilities marked, call 811 at least two days but not more than 10 days before you plan to start your project. (You can still call Dig Safely New York directly at 1.800.962.7962.) For more information, visit nyseg.com, click on "Usage and Safety" and then on "Dig Safely."

Page 4 of 4

Terms and Definitions

Delivery charge: what you pay NYSEG to transport energy to your home or business.

Supply charge: what you pay for the energy purchased for you by NYSEG or a supplier other than NYSEG.

Payment & billing services charge: the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than NYSEG will not be assessed this charge by NYSEG if their ESCO's supply charges appear on their NYSEG bill, however, their energy supplier may charge a similar fee.

Competitive meter charge, Competitive meter service charge, and Competitive meter data service: apply to customers billed under service classes 2, 3, and 7 whose metering services are provided by NYSEG. These meter services charges, previously included in the customer charge, are now broken out in the electricity section of the bill. Customers with a demand of 50 kilowatts or more for two consecutive months who use a meter service provider and a meter data service provider other than NYSEG are not assessed these charges.

Basic service charge: includes a portion of the cost of the meter, meter reading, billing and part of the cost for delivery service. Appears on your bill whether or not you use any electricity or natural gas during the billing period.

Kilowatt-hours (kwh): measure of electricity use.

Residential consumer discount: monthly payment received from the New York Power Authority (NYP&A) to be used for the benefit of residential customers. It is included in the Transition Charge.

ccf (hundreds of cubic feet): measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

Merchant function charge: reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than NYSEG are not charged by NYSEG for this service.

New York State Assessment: As required by state law, effective July 1, 2009, utilities must collect a special state assessment from all customers for the state's general fund. Utilities are required to collect this assessment through March 2014.

Reliability support services (RSS) charge: the cost incurred by NYSEG for third-party services to ensure local electric reliability needs are met.

Renewable Portfolio Standard (RPS) charge: a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission.

System Benefits Charge (SBC): a state-mandated charge for all electricity and natural gas customers. The electricity SBC is used to fund energy efficiency programs to meet state energy use reduction targets, provide assistance for low-income customers and conduct energy research. The natural gas SBC is used to fund initiatives focused on reducing natural gas use in the state as part of the Energy Efficiency Portfolio Standard. These charges were required by the Public Service Commission.

Revenue Decoupling Mechanism: a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

Weather adjustment: moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

Meter Mult (Meter Multiplier): when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "NYSEG Detailed Account Activity" section of your bill.

Transition charge/surcharge: reflects the costs of making the electricity and/or natural gas industry more competitive; includes associated credits and/or charges.

Prorated bills: calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

Pay your bill by mail, at nyseg.com or at any of NYSEG's authorized pay agents. If you pay in person, please bring your entire bill.

Payment is due when you receive your bill. Your payment must be postmarked by the "Late Fee After" date shown on page 1. If paying in person, payment must be made by the "Late Fee After" date. Payments received after the "Late Fee After" date will be subject to a 1.5% late payment charge per month.

For Brewster Division and some Liberty Division customers who have NYSEG electricity supply service, effective May 1, 2014, the capacity component of the supply charge will be calculated based on the new Lower Hudson Valley capacity zone approved by the Federal Energy Regulatory Commission. This component is based on the peak use (how and when power is used); tends to be higher in the eastern part of the state; and is included in the supply charge line item under "Electricity Supply Charges" on the NYSEG bill. More information can be found at nyseg.com, click on "Choose an Energy Supplier" under "Usage and Safety," then on "Energy Supply Choice Resources." View a map of the state's capacity zones by clicking on the link next to "Unsure of your region?"

By law, NYSEG requires periodic access to meters that are inside or otherwise difficult to access. Learn more at nyseg.com - click on "Your Account" and then on "Reading Your Meter." If you're unavailable to provide access to meters on a scheduled meter reading date, call 1.800.572.1111.

Look Up ... Look Out! When working outside, remember to watch overhead. Aluminum siding, gutters, ladders, and other materials can conduct electricity. If anything touches a power line, the results could be deadly. For more information go to "Usage and Safety" at nyseg.com.

If you need service turned on or off, don't wait. We can schedule your request months in advance. Visit us anytime at nyseg.com/online or contact us at 1.800.572.1111. We need at least 24 hours' notice to schedule your request.

Effective July 1, the Temporary State Assessment Surcharge (TSAS) on electricity bills has changed. The state-mandated TSAS appears as a separate line item "NY state assessment" in "Electricity Delivery Charges" and has been included since July 2009. The funds generated through this surcharge go to the state's general fund.

Here are some simple ways to stay cool and save money: Close blinds and drapes on sunny days. Avoid cooking and baking on hot days. Use fans instead of air conditioners. For many more tips on using energy wisely, visit nyseg.com and click on "Usage and Safety," and then on "Using Energy Wisely."

Learn what you need to do before, during and after storm-related power interruptions with our free Weathering Storm Emergencies information sheet. Visit nyseg.com and click on "Your Home" and then on "Energy Library - Quick Links."

Terms and Definitions

Delivery charge: what you pay NYSEG to transport energy to your home or business.

Supply charge: what you pay for the energy purchased for you by NYSEG or a supplier other than NYSEG.

Payment & billing services charge: the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than NYSEG will not be assessed this charge by NYSEG if their ESCO's supply charges appear on their NYSEG bill, however, their energy supplier may charge a similar fee.

Competitive meter charge, Competitive meter service charge, and Competitive meter data service: apply to customers billed under service classes 2, 3, and 7 whose metering services are provided by NYSEG. These meter services charges, previously included in the customer charge, are now broken out in the electricity section of the bill. Customers with a demand of 50 kilowatts or more for two consecutive months who use a meter service provider and a meter data service provider other than NYSEG are not assessed these charges.

Basic service charge: includes a portion of the cost of the meter, meter reading, billing and part of the cost for delivery service. Appears on your bill whether or not you use any electricity or natural gas during the billing period.

Kilowatt-hours (kwh): measure of electricity use.

Residential consumer discount: monthly payment received from the New York Power Authority (NYP&A) to be used for the benefit of residential customers. It is included in the Transition Charge.

ccf (hundreds of cubic feet): measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

Merchant function charge: reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than NYSEG are not charged by NYSEG for this service.

New York State Assessment: As required by state law, effective July 1, 2009, utilities must collect a special state assessment from customers for the state's general fund.

Reliability support services (RSS) charge: the cost incurred by NYSEG for third-party services to ensure local electric reliability needs are met.

Renewable Portfolio Standard (RPS) charge: a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission.

System Benefits Charge (SBC): a state-mandated charge for all electricity and natural gas customers. The electricity SBC is used to fund energy efficiency programs to meet state energy use reduction targets, provide assistance for low-income customers and conduct energy research. The natural gas SBC is used to fund initiatives focused on reducing natural gas use in the state as part of the Energy Efficiency Portfolio Standard. These charges were required by the Public Service Commission.

Revenue Decoupling Mechanism: a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

Weather adjustment: moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

Meter Mult (Meter Multiplier): when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "NYSEG Detailed Account Activity" section of your bill.

Transition charge/surcharge: reflects the costs of making the electricity and/or natural gas industry more competitive; includes associated credits and/or charges.

Prorated bills: calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

Pay your bill by mail, at nyseg.com or at any of NYSEG's authorized pay agents. If you pay in person, please bring your entire bill.

Payment is due when you receive your bill. Your payment must be postmarked by the "Late Fee After" date shown on page 1. If paying in person, payment must be made by the "Late Fee After" date. Payments received after the "Late Fee After" date will be subject to a 1.5% late payment charge per month.

Effective September 1, there is an annual electricity delivery rate change to reflect the phase-out of the Industrial/High Load Factor delivery rates under the terms of the 40-month rate plan approved by the Public Service Commission in September 2010. Customers may see some charges prorated on a September or October bill to take into account energy delivered before and after the new electricity delivery rates went into effect.

e-Bill lets you view, pay and store all your bills in one place. You can view exact copies of your bills online, set up helpful payment reminders and store your bills for quick and easy access. Enroll today at nyseg.com.

We're giving away a \$100 NYSEG bill credit to one lucky customer each month through December 2014. Each month you're enrolled in Autopay, you'll have a chance to win a \$100 bill credit. The sooner you enroll, the more chances you'll have to win! You can also enter to win without enrolling. Visit nyseg.com today for details.

Look Up ... Look Out! When working outside, remember to watch overhead. Aluminum siding, gutters, ladders, and other materials can conduct electricity. If anything touches a power line, the results could be deadly. For more information go to "Usage and Safety" at nyseg.com.

If you need service turned on or off, don't wait. We can schedule your request months in advance. Visit us anytime at nyseg.com/online or contact us at 1.800.572.1111. We need at least 24 hours' notice to schedule your request.

Effective October 1, the Renewable Portfolio Standard (RPS) charge on electricity bills has changed. The RPS is a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission. It is combined with the System Benefits Charge and the Energy Efficiency Portfolio Standard charge and displayed as one line item on your bill.

For some customers, effective November 1, the revenue decoupling mechanism (RDM) adjustment has changed. This item, either a charge or credit, reflects the difference between forecast and actual delivery revenues by service classification. It is designed to encourage utilities to promote energy efficiency and renewable energy technologies.

NYSEG's Project SHARE and RG&E's Heating Fund have joined forces to become the new NYSEG and RG&E Project SHARE Heating Fund. Funded by customer, employee and company contributions, the NYSEG and RG&E Project SHARE Heating Fund grants help eligible customers with active disconnect notices. The fund is administered by HeartShare Human Services of New York. To learn more or apply for a grant call 1.800.599.HEART (4327) weekdays, 9 a.m. to 5 p.m. Or go to <http://www.heartshare.org/programs/energy-assistance/projectshare.html>.

eBill lets you view, pay and store all your bills in one place. You can view exact copies of your bills online, set up helpful payment reminders and store your bills for quick and easy access. Enroll today at nyseg.com.

We're giving away a \$100 NYSEG bill credit to one lucky customer each month through December 2014. Each month you're enrolled in Autopay, you'll have a chance to win a \$100 bill credit. The sooner you enroll, the more chances you'll have to win! You can also enter to win without enrolling. Visit nyseg.com today for details.
