Want a quick way to report a power outage?

Check out our outage center at www.greenmountainpower.com. Not only can you report your outage online and check on its status, you can also access your GMP account and find lots of information about our renewable energy projects, GMP Smart Power and electrical safety.

Not near a computer? Use your mobile device anytime to report an outage or access your account. We've made it really easy at m.greenmountainpower.com.

You can also report your outage on the Green Mountain Power Facebook page, where we also have regular postings about energy issues.

Of course, you can always call us at 1-888-835-4672!

Winter energy conservation tip: The short days and cold weather during winter months lead most people to use more lights, stay indoors more, cook more and even take longer showers. Holiday lights may increase your electricity use. Turning off lights when you leave a room can have a noticeable effect on your bill.

Please return this portion when paying by mail.

There are some simple steps you can take to keep your home electrically safe during the holidays. Avoid over-loading outlets and never force a plug into an outlet if it doesn't fit. Don't run electrical cords under rugs or carpets because they could cause a fire if they overheat. Never use appliances or lights with frayed, cut or damaged cords as they can also cause a shock or fire. Make sure you use the correct wattage light bulb in every fixture. Finally, install Ground Fault Circuit Interrupters (GFCIs) in bathrooms, crawlspaces, garages, kitchens, and outdoor outlets. They automatically cut the power to an appliance if it falls into water or if you are standing in a puddle. You can buy these inexpensive devices at the hardware store and have an electrician install them. You should test GFCIs monthly.

We are happy to tell you that for the first time in decades, Green Mountain Power is lowering its base rates. The Vermont Public Service Board has approved our request to lower customer rates by 0.4 percent beginning October 1.

The new rates reflect our commitment to save you money as a result of the recent merger. We have guaranteed \$144 million in savings during the first ten years. The guaranteed savings of \$2.5 million in the first year of the newly merged company made the rate decrease possible, when otherwise we would have expected an increase.

The 0.4 percent decrease will apply across the board to previously existing GMP and CVPS customer rates.

Home heating tips to increase efficiency

- Keep your thermostat set at as low a temperature as is comfortable. The experts recommend 68F. Every degree below that decreases your bill by 1-3%.
- Keep your thermostat setting constant throughout the day. Lower it at night. Frequent changes to your temperature setting wastes energy.
- A programmable thermostat can lower your heating costs by as much as 20% and pay for itself within the first year.
- Clean or replace furnace filters once a month.
- Clean warm-air registers, baseboard registers, and radiators. Keep drapes, carpeting, and furniture from obstructing the flow of warm air into rooms.

Did you know that we have installed three Plug 'n Go public charging stations for electric vehicles in Vermont? To help make them sustainable we also installed solar arrays to provide enough renewable power to meet the annual demand of the electric vehicles for the next three years. To find out more, including directions to these locations, check out our website:
www.greenmountainpower.com/renewable/plug/plugn-go-stations/

Under our alternative regulation plan, rates may be adjusted quarterly if power supply costs are different than expected. Power supply costs for the recent quarter were lower than we forecasted. You will see a decrease of about 3% from Oct. - Dec. Residential customers using 600 kWh, the decrease will be \$2.82 a month.

Please return this portion when paying by mail.

Tips To Reduce Energy Costs

- Vermonters with incomes at or below 60% of Vermont's median income can apply for weatherization assistance. Your local office can be found at www.dcf.state.vt.us/oeo/weatherization.
- Vermont's Fuel Assistance Program helps low-income Vermonters pay for a part of their winter home heating bills. Go to www.dcf.vermont.gov/mybenefits, or if you have any questions, call the Benefit Service Center at 1-800-479-6151. Apply today to help stay warm this winter!
- Efficiency Vermont provides information on home energy savings, rebates for qualifying energy-efficient products, and incentives to help Vermonters pay for energy efficiency home improvements completed by a certified Home Performance with ENERGY STAR contractor. Call 888-921-5990, or visit www.efficiencyvermont.com.
- CALL 2-1-1 for confidential, streamlined access to community resources for everyday needs and difficult times.

UPCOMING RATE CHANGE

We have asked for approval to reduce your rates by 0.4 percent, beginning October 1. As part of our recent merger, we guaranteed \$144 million in savings over the next 10 years, with \$2.5 million of savings guaranteed for the first year. Those guaranteed savings made this rate reduction possible, along with a lot of hard work identifying other efficiencies and operational savings we can pass on to you.

Planning to cut some firewood this year? Never cut a tree close to a power line. Be very careful because trees are taller than they appear from the ground. If a tree falls into a line, the power can flow through the tree and give you a fatal shock. If a tree falls on a line, don't touch it. Call us for help.

Please return this portion when paying by mail.

SUMMER SAFETY TIPS

Before you do any outside work around your home, you should take a moment to look for overhead power lines. Most high voltage power lines are not insulated (that's why we place them so high). A few lines do have insulation, but it is not to protect you against electric shock. So to be safe, you should maintain a safe distance and do not come in contact with any electrical line.

If you are trimming trees, moving a ladder, or just flying a kite, look for power lines and plan your work carefully. The rule of thumb (and OSHA rule) is not to let anything - including your equipment - come within ten feet of the line. It is a good idea to have someone working with you to make sure that you keep a safe distance from the line.

Please be careful. Your life may depend on it.

KEEP COOL FOR LESS

Here are some ways you can keep cool this summer and use less electricity. If you can cool your home adequately using a fan, you will use far less electricity than you would using an air conditioner. A ceiling fan uses about one-tenth the electricity of an air conditioner. If you are installing an air conditioner, try to locate it in a shaded area or on the northern side of your house, since sunlight falling directly on it increases its workload.

Make sure your attic is well ventilated to relieve the heat buildup caused by the sun. If necessary, add or enlarge vents. Drawing shades to block the sunlight during the hottest part of the day or installing awnings over windows exposed to direct sunlight are other ways to keep your cooling costs lower.

PLANTING TREES NEAR YOUR HOME?

If you are planting any trees near utility lines, there are some simple ways you can avoid the expense, risks and aesthetic problems of having them grow too near the lines. Plant taller trees, such as maple, oak, spruce and pine, at least 50 feet from the distribution lines that run along streets. Medium size trees, those that will grow to a maximum of 40 feet, should be planted at least 20 feet from a line. If you wish to place a tree within 20 feet of a distribution line, choose a small tree that will only reach a height of 25 feet or less, such as dogwood or crabapple. If you need help deciding which tree would be best for you, visit your local tree nursery. They can give information on all the species that do well in Vermont.

The Winooski River Sojourn -

Join the Friends of the Winooski River for a fun and educational trip down the Winooski River, June 19 to June 24. The Sojourn is a multi-day paddling trip on the Winooski River that inspires connections to the river and among the communities and users of the river.

Green Mountain Power is supporting this event in recognition of the importance of the Winooski River in providing clean, renewable electricity with the six hydro plants we own and operate along the river and its tributaries. We will be offering tours of our hydro plant in Essex Junction on Saturday morning, June 23.

Join the Friends for a day or the whole trip. For more details, check www.winooskiriver.org, call 802-882-8276 or email the Friends at info@winooskiriver.org.

Merger update

We are making good progress in our goal of merging GMP and CVPS in order to become a stronger company to better serve our customers. The new GMP will continue to deliver the same affordable, clean and reliable power that Vermonters have relied on for generations.

As part of our commitment, we will pass \$144 million in merger savings to customers over ten years through bill credits that will cut costs for families and businesses.

We hope to have a decision from regulators early this summer.

Learn more at GMPCVPSmerger.com.

Important outdoor safety tip: If you are planning to do any excavation work in or near utility right-of-ways, do it safely by calling Dig Safe first at 1-888-DIG-SAFE or 811. Dig Safe notifies participating companies, like GMP, to mark their lines. Remember - before you dig, call Dig Safe. Its the law - and your life.

Stretch your budget with 3SquaresVT and school meals!

3SquaresVT gives Vermonters extra money every month for more food. 1 in 6 Vermonters get 3SquaresVT. Many families and elders qualify but don't know it as income limits have increased and savings don't count against you. Benefits come on a debit card, so you have privacy and choices when you shop. Plus, with 3SquaresVT, kids get free school meals too. Visit www.vermontfoodhelp.com or call 1-800-479-6151 for more information or to apply.

Smart Grid Update

We are making great progress in installing new digital technology across the electric grid to improve your service. New communications equipment on our substations and transmission lines will automatically relay information to help us manage the system better. And we've begun installing new advanced meters that will give you access to more detailed information about your own usage.

We will notify you approximately two months before we change out your meter. After all 95,000 meters have been installed by spring 2013, there will be opportunities for you to access information and participate in programs to help you manage your use and save money.

An easy way to learn about all the work we are doing with GMPCconnects is to check out three short videos on our webpage. Visit www.greenmountainpower.com and click on "Learn more about Green Mountain Power's Smart Grid program."

You should always be prepared for power outages. Have flashlights with fresh batteries, a battery operated radio so you can listen to news updates, food and a manual can opener, and bottled water if your water source is a well. Be aware of the risk of hypothermia, especially for older people or young children.

SAVE MONEY ON YOUR TAXES

The Earned Income Credit (EIC) is a tax benefit for people who worked full- or part-time in 2011. If you qualify, you'll owe less in taxes, and you may get cash back. Even if you don't owe income tax you can get the credit, but you must file a federal tax return.

For information about how you can get the EIC and free help filing your taxes, call the IRS at 1-800-906-9887.

Date	KWH	Days	Usage/Day	Cost/Day
February 2011	5600	28	200	27.68
February 2012	2880	28	103	15.10

Concerned about your energy usage? For information about energy efficiency services available to you, please call Efficiency Vermont toll free at 1-888-921-5990 or email info@efficiencyvermont.com.

For your convenience, you may pay your electric bill at any of the businesses listed below:

Peoples United Bank

TD Banknorth: Richmond and Winooski branches only

Hannafords: Brattleboro, Essex, S. Burlington, Williston

Jock Oil Co: Wells River

We also offer the following payment options: Automatic Draft and Speedpay credit/debit card services.

Green Mountain Power's extensive planning and preparation for Tropical Storm Irene paved the way for us to respond quickly and cost effectively to massive outages. Despite devastating damage across the state and 40,000 reported outages, Green Mountain Power restored power to all of its customers in two and a half days, with the exception of those whose buildings could not safely be restored due to the flooding.

As a result of the extraordinary and unusual expenses of restoring power following Irene, there will be a separate storm charge of 0.54% on your monthly bills beginning February 2012 and continuing through the year, as allowed by our alternative regulation plan. For an average residential customer using 600 kwh per month, the charge will be 54 cents per month.

If you have any questions about this charge or any other aspect of your service, please call 1-888-835-4672 or email callcenter@greenmountainpower.com

Never use a back-up generator indoors, in a garage or outdoors near windows as it can expose you to dangerous levels of carbon monoxide. The gas is odorless and colorless and exposure to CO can be fatal. Be sure your generator is installed in accordance with National Electrical Codes and learn the symptoms of CO exposure.

Please return this portion when paying by mail.

A great way to learn more about new smart grid technology including advanced meters is to visit www.greenmountainpower.com. You'll find lots of information about how we will improve the reliability and flexibility of our grid through the use of smart technology.

Over the next year we will be replacing all of our existing meters with new advanced meters. Different from current electric meters, advanced meters have the potential to allow GMP and customers to send and receive information from the meters in near real-time. Advanced meters will allow GMP and GMP customers to take advantage of this information so that we can operate the grid more reliably and you can use the information to manage your energy usage, and in turn your costs and carbon footprint.

We will contact you with details as the scheduled time for meter replacement for your neighborhood approaches, including information about our advanced meter opt-out program.

Winter electric bills are often higher than other months. The short days and cold weather lead most people to use more lights, stay indoors more, cook more and even take longer showers. Holiday lights may also increase your electricity use. Turning off lights when you leave a room can have a noticeable effect on your bill.

There are some simple steps you can take to keep your home electrically safe during the holidays. Avoid over-loading outlets and never force a plug into an outlet if it doesn't fit. Don't run electrical cords under rugs or carpets because they could cause a fire if they overheat. Never use appliances or lights with frayed, cut or damaged cords as they can also cause a shock or fire. Make sure you use the correct wattage light bulb in every fixture. Finally, install Ground Fault Circuit Interrupters (GFCIs) in bathrooms, crawlspaces, garages, kitchens, and outdoor outlets. They automatically cut the power to an appliance if it falls into water or if you are standing in a puddle. You can buy these inexpensive devices at the hardware store and have an electrician install them. You should test GFCIs monthly.

**WE WILL MATCH YOUR
 CONTRIBUTIONS TO WARMTH**

There is a simple way to help fellow Vermonters stay warm this winter. Your donation to the WARMTH Support Program goes directly to families facing a home heating crisis.

Green Mountain Power was one of the founders of this program and we continue to support its administration through Community Action agencies. Green Mountain Power matches all customer contributions to the WARMTH program. This past year GMP matched more than \$21,000 donated by customers, for a total donation from GMP and customers of \$42,600.

We encourage you to give generously to this program --- and because utilities cover the administration costs, 100 percent of your gift will go directly to a family in need. And with the Green Mountain Power match, your contributions to WARMTH will go twice as far. Please read the enclosed brochure for more information.

Electricity and water should never come together. Make sure your home has ground fault circuit interrupters in all kitchen, bathroom, garage and outdoor outlets. This safety device automatically cuts the power to an appliance if it falls into water before it can shock you. You can find GFCIs in most hardware stores.

Please return this portion when paying by mail.

Tips To Keep Your Winter Bills Lower

This is a good time to take steps to control your winter heating bills. Here are some ideas:

- Vermonters with incomes at or below 60% of Vermont's median income can apply for weatherization assistance. Your local office can be found at www.dcf.state.vt.us/oeo/weatherization.
- Vermont's Fuel Assistance Program helps low-income Vermonters pay for a part of their winter home heating bills. Go to www.dcf.vermont.gov/mybenefits, or if you have any questions, call the Benefit Service Center at 1-800-479-6151. Apply today to help stay warm this winter!

RATE CHANGE

We work hard to minimize rate increases and have been successful in keeping our operation and maintenance costs virtually flat for several years. However, necessary investments in infrastructure and modest increases in power supply costs are causing increases in the cost to serve you.

As a result, the Public Service Board has approved a base rate adjustment increase of 3.2% to go into effect with this month's bills. The monthly bill for an average residential customer using 600 kilowatthours will increase by \$3.09 from \$96.53 to \$99.62.

Green Mountain Power has the lowest overall rates of major utilities in New England. We already operate very efficiently, with the most customers served per employee of any utility in the state, and we meet or exceed very high customer service standards, such as how quickly customers calls are answered and the reliability of the electric service. We will continue to work very hard to provide you with premier service while operating effectively to keep rates as low as possible.

Our hearts go out to all our customers whose homes and businesses were damaged or destroyed by Hurricane Irene. And we thank all of you who lost your power during the storm for your patience and support as we restored service.

It was a tough storm, but our extensive planning and preparations helped us respond quickly and effectively. While we had more than 40,000 outages reported, we restored service to all in a little more than two days, except for customers who needed electrical inspections due to flooding.

More than a million customers across New England lost power during the hurricane, and in Vermont the flooding and damage to roads severely hampered recovery efforts.

We know that reliable electrical service and fast restoration of power outages is important to everyone. We will continue to do everything we can to provide you with the most cost effective and reliable service we can.

Under our alternative regulation plan, rates may be adjusted quarterly if power supply costs are different than expected. Power supply costs for the recent quarter were lower than we forecasted. You will see a credit of about 0.06% from Oct. - Dec. Residential customers using 600 kwh will see a monthly credit of 49 cents.

Please return this portion when paying by mail.

Payment due before 10/24/11 to avoid late fee. Next reading approx 10/20/11

As you may know, *GMPConnects* is GMP's smart grid program, which will improve the reliability and flexibility of our grid through the use of advanced technology.

As part of our project, we will be replacing all of our existing meters with new, advanced meters that have two-way, wireless communications capabilities. Different from current electric meters, advanced meters have the potential to allow GMP and customers to send and receive information from the meters in near real-time. Advanced meters will allow GMP and GMP customers to take advantage of this information so that we can operate the grid more reliably and provide you with more options in how you use energy to help you manage your costs and your carbon footprint.

We will contact you with details as the scheduled time for meter replacement for your neighborhood approaches, including information about our advanced meter opt-out program.

Date	KWH	Days	Usage/Day	Cost/Day
September 2010	0	30	0	0.59
September 2011	0	32	0	0.57

Concerned about your energy usage? For information about energy efficiency services available to you, please call Efficiency Vermont toll free at 1-888-921-5990 or email info@efficiencyvermont.com.
