

C+GA is a certified women owned business (WBE), providing award-winning architectural and planning services that serve the needs of the client, the environment and the community.

Over the past 30 years, we have completed a wide range of residential, academic, cultural and commercial projects for public, private, and non-profit organizations.

With a diverse staff of nearly 50 experienced professionals, we're structured to give each client the most personalized service possible.

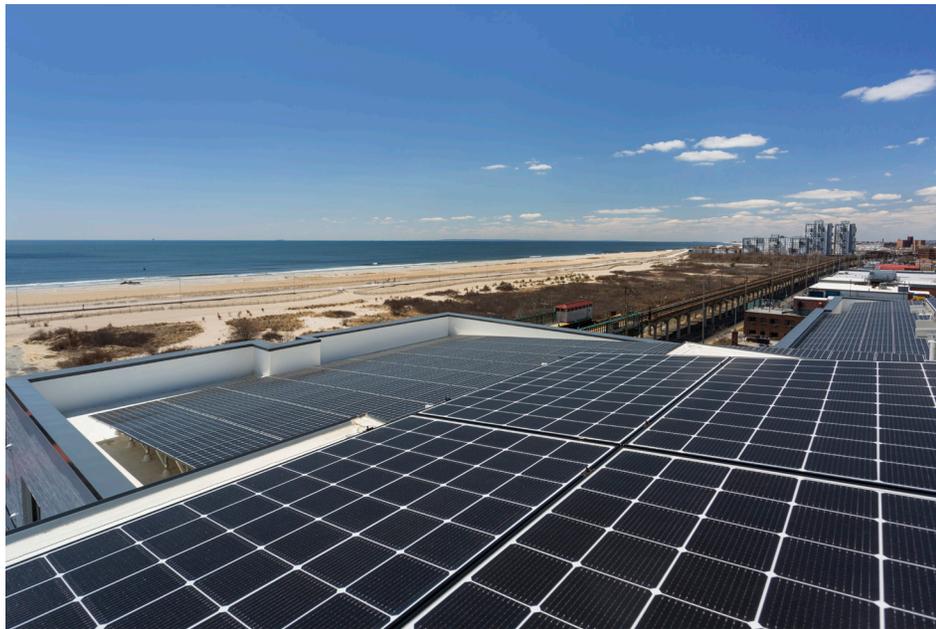

Third Avenue Development (Passive House)

Sustainability + Resiliency is a Priority

C+GA is a leader in sustainable design in NYC. We are committed to incorporating sustainable and restorative strategies using the latest technology, innovative techniques, and best practices.

This allows us to maximize the environmental benefits and minimize the carbon footprint for future generations.

Above and top: Beach Green Dunes I & II (Passive House)

We are ranked 54 on the Building Design + Construction 2019 Top 140 Multifamily Architecture and AE Firms and made *ENR's* 2020 Top 100 Green Design Firms.

Our projects include:

- 12 LEED certified projects at the Silver, Gold and Platinum levels
- 15 Passive House projects (9 completed)
- The largest completed affordable PHIUS-certified residential building in the country
- 50+ that meet the Enterprise Green Communities (EGC) residential program requirements

We Build Community

C+GA designs support missions. We look at societal issues through the lens of architectural opportunity to help create better buildings, neighborhoods, and cities for the benefit of all.

We devise creative yet economical design solutions that strive to further social and environmental equity and influence policy for the greater good.

To help meet New York's affordable housing needs, we have completed over 15,000 individual units and have another 4,100+ underway.

C+GA's expertise goes beyond the design of individual buildings or spaces.

Our approach facilitates meaningful connections between stakeholders and finds ways to create projects that are enduring, resilient, and energy efficient.
